# About PRiME

Since 2017, the Centers for Learning on Evaluation and Results (CLEAR) and the International Fund for Agricultural Development (IFAD) have joined to design and implement PRiME, a training and certification framework for Monitoring and Evaluation (M&E) of rural development.

## Overall Objective

Establish a high quality, global “M&E in Rural Development” training programme that improves data collection and results measurement to foster informed decision-making based on evidence.

## Direct Target Group

- Government officials
- Consultants
- Partners from international financial institutions and multilateral development banks
- Any other participant interested in the rural development sector

## Expected Outcomes

Increasing M&E capacity and setting high M&E standards in the rural sector;

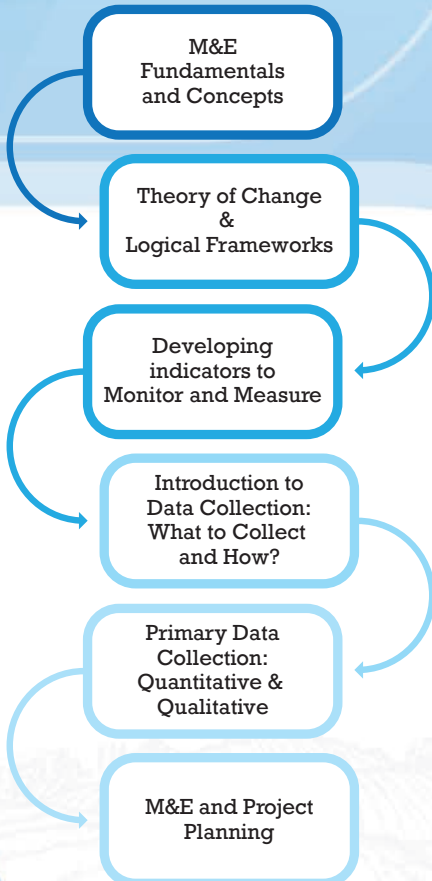

Developing a knowledge repository for rural- focused M&E training materials; and

Establishing a recognized and sustainable training programme with a global certification practice for M&E in rural development.

## Courses

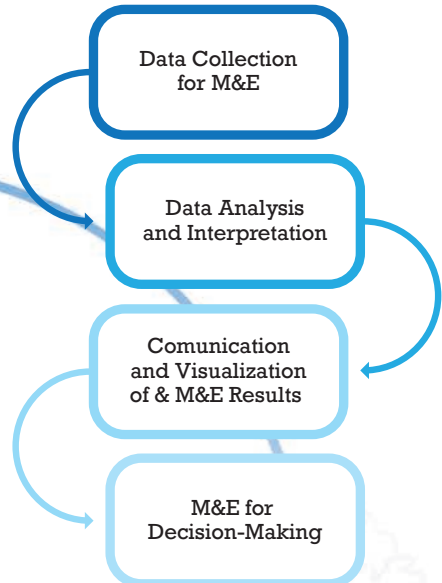

PRiME has developed and rolled out the M&E Fundamentals training program, which is comprised of two courses.

### M&E Fundamentals 1

Both courses consist of 5 days of in-person training and an online multi-format assessment that lead to certification. The courses are offered in English, French, and Spanish.

### M&E Fundamentals 2

## Global Public Good

PRiME promotes the dissemination of knowledge that strengthens M&E knowledge, skills, and practices in the rural development sector.

A knowledge management repository is available on the PRiME website ([www.primetraining.global](http://www.primetraining.global)).
